# COMPANY PROFILE 2025

COMCENTRIC  
SOLUTIONS

# 2015 - NOW

Since its incorporation in 2015, Today **Comcentric Solutions Sdn Bhd**, an Information Technology, Telecommunication, Geographical Information System company, is expanding to become a regional player in the Southeast Asian market. We started in Malaysia and recently opened our first overseas operation in Indonesia. Our main strength is 75 qualified personnel in various fields related to our core business activities.

Registered with Ministry of Finance, CIDB, TNB and Telekom Malaysia, we always adhere to our internal policy to maintain a healthy corporate record every time. In 2020, the company has been successfully accredited with ISO:9001 Certification.

We are a customer-driven company that always put our customers' interests first to win their trust in us to keep us growing from strength to strength. Currently we are providing our services to more than 20 clients in Malaysia and Indonesia.

Meanwhile, our sales revenue since the last 2 years has reached RM20 million despite the Covid-19 global epidemic. We have our management and staff to thank for this outstanding achievement.

Together in unison, our cumulative experience exceeds 260 man-years in which the average experience is 3.5 years per individual. We have 6 core expert staff leading various departments in our company each of whom possess more than 20 years industrial experience. It is our corporate philosophy that our human capital are most valuable assets to push us forward to scale a new height.

**Ahmad Zainul Abidin**  
Chief Executive Officer

# **ICT, ERP & IOT DEPARTMENT**

# Mohamad Hajazi Mustafa

He leads our Communication Department since 2015 bringing more than 30 years experience in ICT, Electrical and Electronics. His peers considered him as a technology evangelist and a superb multi-talented full-stack CTO.

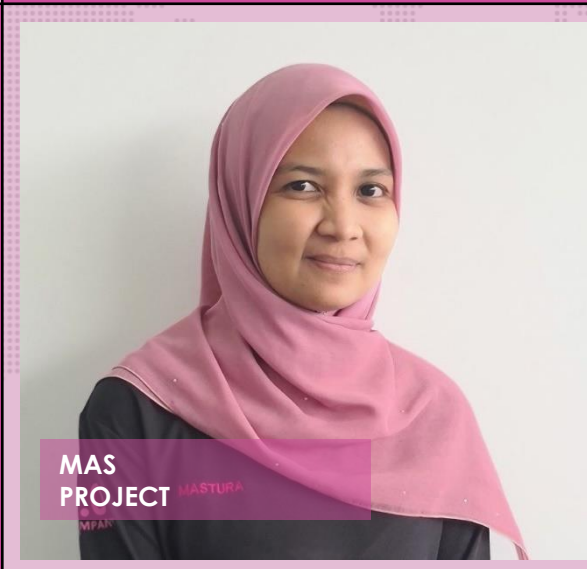

He graduated from the University of Ibaraki, Hitachi Japan in 1993 and ever since has managed 100+ projects with exceptional performance. He possesses Prince2 Project Management Certificate.

He manages 12 talented staffs in his department and has passion in location-based electronic system, telemetry, IR 4.0 and new emerging technologies.

As the Head of the ICT, EP & IOT Department, he is fully responsible to provide services for the application of business and technical expertise to enable organizations in the creation, management and optimization of or access to information and business processes.

Our ICT services can be segmented by the type of skills that are employed to deliver the service (design, build, run). There are also different categories of service: business process services, application services and infrastructure services.

# SUBJECT MATTER EXPERTS

A faint, dotted world map in the background, rendered in a light purple color. The map shows the outlines of the continents, with the dots forming a grid-like pattern that fills the landmasses.

# **SOLUTIONS**

# ERP SOLUTIONS

An ERP system that combines various functions such as website management, sales management, financial management, human resources management, information management, and operation management can help businesses enhance efficiency and productivity. These modules work together to manage various aspects of the business, including managing sales orders, tracking financial performance, managing HR processes, maintaining a website, and streamlining operations.

Moreover, these ERP systems can be customized to meet the specific needs of a business, including adding new modules, integrating with other software, or customizing features to meet specific requirements. This level of customization provides flexibility and scalability, allowing businesses to adapt to changing market conditions and evolve their systems as their needs change over time.

## Website Management

# ADVANCED METER INFRASTRUCTURE SOLUTIONS

Advanced Meter Infrastructure (AMI) is an innovative system for remotely collecting and managing energy consumption data. The gh.n standard Broadband over Power Line is a communication technology that enables data to be transmitted through power lines, providing a reliable, cost-effective, and efficient means of communication.

The advantages of AMI based on the gh.n standard Broadband over Power Line are numerous. First, it provides real-time data on energy consumption, enabling utilities to better manage their grid and optimize their resources. Second, it reduces the need for manual meter reading, improving accuracy and reducing labor costs. Third, it allows for better customer engagement and control over energy usage, helping consumers make informed decisions and lower their energy bills.

Many clients worldwide have already implemented AMI based on the gh.n standard Broadband over Power Line, with proven success in enhancing grid management, improving energy efficiency, and reducing costs.

# CORE ISLAMIC NEOBANKING SYSTEM

IFICORE is an innovative Core Islamic Neobanking System that leverages the latest fintech, regtech, robo advisory, and automated business process technologies to offer a comprehensive, fully integrated solution for Islamic banks and financial institutions. IFICORE offers several benefits, including seamless end-to-end process automation, lower operational costs, improved efficiency, and enhanced customer experiences.

The system's cutting-edge robo-advisory capabilities enable it to provide customized and personalized financial advisory services to clients, resulting in better investment decisions. IFICORE also offers a comprehensive regulatory compliance framework, making it easier for banks and financial institutions to meet regulatory requirements.

The system's automated business process and analytics tools provide in-depth insights into customer behavior, preferences, and financial performance, allowing banks and financial institutions to optimize their operations, increase revenue, and remain competitive in the rapidly evolving financial services industry.
